

# Jacob Nevitt

## Software Developer

07595373585 | [jacobnevitt@gmail.com](mailto:jacobnevitt@gmail.com)

[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

**Frontend-focused Software Developer with more than six years of experience building modern web applications using React, TypeScript, Vue.js and Next.js, with full-stack experience across Node.js, C#/.NET, REST APIs and PostgreSQL. Proven track record of delivering user-focused products, improving performance and conversion, and taking features from requirements through to production.**

## Technical Skills

**Frontend:** JavaScript, TypeScript, React, Next.js, Vue.js, Angular, Tailwind CSS, Vite

**Backend & APIs:** Node.js, Express.js, C#, .NET, REST APIs, GraphQL, PostgreSQL

**Testing & Tools:** Jest, Vitest, Git, CI/CD, Docker, AWS, Contentful

## Experience

### Software Developer | Sicon | June 2026 – Present

- Develop **React** and **TypeScript** features for a large-scale enterprise ERP application, building reusable components and maintaining structured application state.
- Deliver full-stack functionality across React frontends and **C#/.NET** APIs, integrating UI features with backend services and business logic.
- Work with product owners, developers and QA engineers to take features from requirements and refinement through development, testing and release.
- Contribute to code reviews, debugging and refactoring across a large existing codebase, improving maintainability and application performance.

### Freelance Software Developer | Greenhouse Web Designs | Apr 2024 – May 2026

- Designed and developed production websites using TypeScript, Next.js and Tailwind CSS, taking projects from requirements and design through development, deployment and ongoing support.
- Built responsive, accessible and performance-focused interfaces for clients across industries including non-profit and beauty.
- Delivered a multilingual website for an animal rescue organisation using Next.js and next-intl, including localisation, performance optimisation and online donation functionality.
- Worked directly with clients to define requirements, translate business needs into technical solutions and manage end-to-end project delivery.

## Software Developer | Article | May 2021 – Feb 2024

- Developed customer-facing **Vue.js** features for a large-scale eCommerce platform, focused on improving user experience, conversion and site performance.
- Led the redesign of the product page from a single to dual-column layout, **increasing conversions by 12%**.
- Built a cross-sell component that generated **\$30K in sales** within the first month of implementation.
- Led performance improvements, **boosting Lighthouse score by 25%** and reducing load times by 8%.
- Developed **React** apps for Contentful, leveraging **GraphQL** for optimised data querying.

## Software Developer | SpareRoom | Oct 2019 – Oct 2020

- Extended **RESTful APIs** using test-driven development in **Perl** and **Node.js**.
- Developed an **Angular**-based admin frontend and internal tools to improve data access and reporting.
- Integrated and supported payment processing functionality using Stripe and **Node.js**.

## Technical Projects

### [Mood Tracker App](#) – TypeScript, React, Vite, Tailwind CSS, Motion, Node.js, PostgreSQL

Built a real-time full-stack mood tracking application using React, Node.js and PostgreSQL, with custom SVG and Lottie animations. Implemented live updates and interactive UI behaviour using WebSockets and REST APIs.

### [Client Website](#) – TypeScript, Next.js, Tailwind CSS, next-intl, Motion

Built a multilingual website for an animal rescue organisation using Next.js and Tailwind CSS. Includes language localisation with next-intl, site performance optimisation, and a donation system.

## Education

**Northcoders – Full-Stack Bootcamp (2019)**

**Leeds Beckett University — Bachelor of Arts in Media Studies, Honours (2012)**
